

phosphatidylinositol 3-kinase binding signaling adaptor activity

phosphatidylinositol 3-kinase regulator activity

insulin-like growth factor receptor binding SH3 domain binding
SH2 domain binding protein binding, bridging

inositol lipid-mediated signaling T cell costimulation T cell receptor complex
integrin-mediated signaling pathway neurotrophin signaling pathway transmembrane receptor protein kinase activity

insulin receptor substrate binding

protein phosphorylated amino acid binding

insulin receptor binding receptor tyrosine kinase binding

phosphatidylinositol 3-kinase complex platelet activation

immune response-activating cell surface receptor signaling pathway ephrin receptor binding
phosphoprotein binding lymphocyte costimulation

immune response-regulating cell surface receptor signaling pathway involved in phagocytosis
extrinsic component of cytoplasmic side of plasma membrane T cell selection

Fc-gamma receptor signaling pathway involved in phagocytosis

protein tyrosine kinase activity receptor signaling pathway via STAT
immune response-regulating cell surface receptor signaling pathway
